GENERAL

This report is part of the *Subject Reports* series and presents cross-tabulations of sample data on housing and household characteristics from the 1980 Census of Population and Housing. Data are shown for the United States. Limited data on units in structure also are shown for regions, divisions, and States.

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The abbreviated identification for this report is HC80-3-4 (i.e., Housing Census, 1980-Volume 3-Chapter 4). This report is one in a series of subject reports comprising Volume 3. (See list on page IV.). Each report in this volume concentrates on a particular subject. Generally, detailed information and cross-tabulations will be provided on a national level; in some reports, data for States or standard metropolitan statistical areas (SMSA's) may also be shown. For a description of the full data dissemination program of the 1980 Census of Population and Housing, see Appendix E, "Publication and Computer Tape Program."

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consulation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability appears in Appendix A, "Area Classifications and Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and 5 appendixes), a table of contents, a map, and 309 detailed tables. Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

A table finding guide lists the characteristics and various race/Spanish origin groups covered in this report and shows the tables in which the various types of statistics appear.

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., regions, divisions, States) and provides definitions and explanations for the subjects covered in this report. Appendix B briefly explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data and on editing procedures. Appendix D contains facsimiles of the respondent instructions and 1980 census questionnaire pages showing the population and housing questions. Appendix E summarizes the data dissemination program of the 1980 census.

DERIVED FIGURES (Means, Medians, and Percents)

This report presents means, medians, and percents as well as certain ratios. The median—a type of average—is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of the cases exceed the median. Percents and other derived measures which round to less than 0.1 are not shown but are indicated as zero (i.e., "–").

Medians for rooms are rounded to the nearest tenth, for persons to the nearest hundredth, and for income, selected monthly owner costs, and gross rent to the nearest dollar. In computing medians for rooms and persons in unit, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 up to 3.5 rooms. In computing median rent, units reported as "no cash rent" are excluded.

The median is computed on the basis of the distribution as tabulated, which is sometimes more detailed than the distribution shown in this report. When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than $50," it is shown as "$50–." When the median falls in the upper terminal category of an open-ended distribution, the initial value of the terminal category is given followed by a plus sign; thus, for example, if the median falls in the category "$250 or more," it is shown as "$250+."

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this, the Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are 10 or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete-count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This requires that the 30-person or 10-housing-unit criterion stated above be applied individually to each race or Spanish origin category.

Finally, complementary supression is applied to prevent the derivation of primary suppressed data by subtraction. For example, housing unit data shown by tenure may require complementary suppression when the number of owner-occupied or renter-occupied housing units is less than 10.

SYMBOLS

The following symbols are used in the tables:

- A dash "—" represents zero or a percent which rounds to less than 0.1.
- Three dots "..." mean not applicable, or that the data are being withheld to avoid disclosure of information for individual housing units. (For further information on disclosure, see the section above on "Suppression of Data for Confidentiality.")

BUREAU OF THE CENSUS

CORRECTION NOTE

1. The "Heating equipment" line in Tables G, I, and J includes households with no heating equipment; that is, the "Heating equipment" line equals the total households in each table. Households with no heating equipment are normally excluded from the "Heating equipment" category.

2. In Tables H and L where the median household income in 1979 is shown as ~~75000+~~, the correct entry should be $2500-.
